

Nuveen Small/Mid Cap Value Fund

Marketing communication | As of 30 Jun 2023

Average annualized total returns (%)

	Inception date	1 year	3 years	5 years	10 years	Since inception
Class I	15 Dec 06	18.82	19.60	6.64	8.00	6.09
Class A without sales charge	15 Dec 06	18.50	19.30	6.37	7.73	5.90
Class A with max. 5.75% charge	15 Dec 06	11.69	16.97	5.12	7.09	5.52
Class C	15 Dec 06	17.65	18.42	5.58	7.08	5.50
Class R6	30 Jun 16	18.92	19.74	6.79		9.68
Russell 2500 Value Index		10.37	16.07	5.32	8.02	6.59
Morningstar Small Blend Cat. Avg		12.53	14.13	5.24	8.28	6.37

Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit [nuveen.com](#). Performance shown for benchmark since inception is as of the Fund's oldest share class.

Class I shares have no sales charge and may be purchased by specified classes of investors. Class C shares have a 1% CDSC for redemptions within less than one year, which is not reflected in the one-year total return. Effective Jul 2018, Class C shares automatically convert to Class A shares during the month in which the 10-year anniversary (effective Mar 2021, this will change to 8-year anniversary) of the share purchase occurred. Since Inception returns for Class C shares for periods longer than 10 years reflect the performance of Class A shares after the deemed 10-year conversion to Class A shares within such periods. Class R6 shares have no sales charge and are available to certain qualified retirement plans and other investors as set forth in the statement of additional information.

Calendar year returns (%)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023 YTD
Class I	-0.38	-5.24	20.47	10.29	-18.39	30.56	0.96	33.90	-5.69	6.80
Class A without sales charge	-0.62	-5.51	20.21	9.99	-18.58	30.20	0.72	33.54	-5.92	6.63
Russell 2500 Value Index	7.11	-5.49	25.20	10.36	-12.36	23.56	4.88	27.78	-13.08	5.83
Morningstar Small Blend Cat. Avg	3.79	-5.38	20.78	12.28	-12.72	23.75	10.99	24.19	-16.24	7.41

Expense ratios (%)

	Class I	Class A	Class C	Class R6
Gross	1.36	1.61	2.36	1.19
Net	1.05	1.30	2.05	0.88

Expense ratios are based on the Fund's most recent fiscal year end. The net expense ratio reflects a contractual commitment by the Fund's investment adviser to waive fees and/or reimburse expenses through 31 Jul 2024. Absent the waiver and/or reimbursement, expenses would be higher and total returns would be less. Please see the prospectus for details.

Overall Morningstar
Ratings™

Category: 596 Small Blend funds

CLASS I ★★★★★

Morningstar ratings may vary among share classes and are based on historical risk-adjusted total returns, which are not indicative of future results.

Top ten positions (%)¹

	Fund net assets

Morningstar rankings and percentiles

Morningstar Small Blend Category

	1 year		3 years		5 years		10 years	
	Rank	%	Rank	%	Rank	%	Rank	%
Class I	35/617	6	23/596	5	109/551	23	235/380	65
Class A	44/617	7	26/596	5	135/551	28	260/380	70
Class C	69/617	11	41/596	8	235/551	48	315/380	86
Class R6	34/617	6	22/596	5	99/551	21	—	—

Morningstar ranking/number of funds in category displays the Fund's actual rank within its Morningstar Category based on average annual total return and number of funds in that Category. The returns assume reinvestment of dividends and do not reflect any applicable sales charge. Absent expense limitation, total return would be less. Morningstar percentile rankings are the Fund's total return rank relative to all the funds in the same Morningstar Category, where 1 is the highest percentile rank and 100 is the lowest percentile rank.

Portfolio statistics

	Fund	Benchmark
Total net assets – all classes (\$mil.)	\$85.3	—
Number of positions	59	1,895
Weighted average market cap (\$bil.)	\$7.0	\$6.5
P/E ratio (forward 12-months)	13.4	12.6
Standard deviation (3 years)	19.65	21.45
Beta (3 years)	0.89	1.00

This data relates to the portfolio and the underlying securities held in the portfolio. It should not be construed as a measure of performance for the Fund itself. Fund beta and standard deviation are based on Class I monthly returns.

Important information on risk

Mutual fund investing involves risk; principal loss is possible. There is no guarantee the Fund's investment objectives will be achieved. Prices of equity securities may decline significantly over short or extended periods of time. Investments in smaller companies are subject to greater volatility than those of larger companies. Non-U.S. investments involve risks such as currency fluctuation, political and economic instability, lack of liquidity and differing legal and accounting standards. These risks are magnified in emerging markets. These and other risk considerations, such as currency and value stock risks, are described in detail in the Fund's prospectus.

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy, sell or hold a security or an investment strategy, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her financial professional.

For the period ended 30 Jun 2023, Morningstar rated this Fund's I shares, for the overall, three-, five-, and 10-year periods (if applicable). The Class I shares received 4, 5, 4, and 3 stars among 596, 596, 551, and 380 Small Blend Funds, respectively. These ratings are for Class I shares only; other classes may have different performance characteristics. Investment performance reflects applicable fee waivers. Without such waivers, total returns would be reduced and ratings could be lower. For the most current ratings, please visit nuveen.com.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating

metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. ©2023 Morningstar, Inc. Glossary

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. P/E ratio of a stock is calculated by dividing the current price of the stock by its forecasted 12 months' earnings per share. The average of the price/earnings ratio of a fund is a weighted harmonic average of all the current P/E ratios (excluding negatives) of the stocks in the Fund's portfolio. This should not be construed as a forecast of the Fund's performance. Standard deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Weighted average market capitalization is the portfolio-weighted mean capitalizations of all equity securities.

Russell 2500 Value Index is an index designed to measure the performance of the small to mid-cap value segment of the U.S. equity universe. It includes those Russell 2500 companies with lower price-to-book ratios and lower forecasted growth values. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees. It is not possible to invest directly in an index.
