**Average annual total returns<sup>2</sup>**

	Qtd	Ytd	1 yr	3 yr	5 yr	10 yr	Life of fund	Life of fund date
Class I without sales charge	3.13	10.83	14.03	5.33	4.07	—	7.15	12/14/16
Class A without sales charge	2.99	10.67	13.68	5.06	3.81	—	6.88	12/14/16
Class A with sales charge	-2.13	5.11	8.02	3.27	2.75	—	6.04	12/14/16
MSCI AC World ex-USA Index	2.44	9.47	12.72	7.22	3.52	—	5.72	—
Foreign large blend category	2.90	10.92	15.67	7.86	3.60	—	—	—

**Expense ratios<sup>3</sup>**

	Gross	Net (what you pay)	Contractual through
Class I	1.18%	0.97%	2/28/2024
Class A	1.43%	1.22%	2/28/2024

The past performance shown here reflects reinvested distributions and the beneficial effect of any expense reductions, and does not guarantee future results. The sales charge for Class A shares, reflects the maximum sales charge of 5.0%. For Class I shares, there is no sales charge. Returns for periods shorter than one year are cumulative, and results for other share classes will vary. Shares will fluctuate in value and, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance cited. For the most recent month-end performance, visit [jhinvestments.com](http://jhinvestments.com).

**Growth of a hypothetical \$10,000 investment<sup>4</sup>**

Class I without sales charge – 1/1/17 – 6/30/23

**1** Diversification does not guarantee a profit or eliminate the risk of a loss. **2** The MSCI ACWI ex-USA Index tracks the performance of publicly traded large- and mid-cap stocks of developed-market and emerging-market companies outside the United States. It is not possible to invest directly in an index. **3** "Net (what you pay)" represents the effect of a contractual fee waiver and/or expense reimbursement and is subject to change. **4** Performance data shown excludes fees and expenses. The performance data would be lower if such fees and expenses were included. Past performance does not guarantee future results.

**What you should know before investing**

Foreign investing, especially in emerging markets, has additional risks, such as currency and market volatility and political and social instability. Large company stocks could fall out of favor. The stock prices of small and midsize companies can change more frequently and dramatically than those of large companies. The fund's ESG policy could cause it to perform differently than similar funds that do not have such a policy. Currency transactions are affected by fluctuations in exchange rates. Please see the fund's prospectus for additional risks.

Request a prospectus or summary prospectus from your financial professional, by visiting [jhinvestments.com](http://jhinvestments.com), or by calling us at 800-225-5291. The prospectus includes investment objectives, risks, fees, expenses, and other information that you should consider carefully before investing.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance does not guarantee future results.

<sup>4</sup> Performance data shown excludes fees and expenses. The performance data would be lower if such fees and expenses were included. Past performance does not guarantee future results. <sup>5</sup> Returns for the fund's first year are since fund inception. <sup>6</sup> Listed holdings reflect the largest portions of the fund's total and may change at any time. They are not recommendations to buy or sell any security. Data is expressed as a percentage of net assets and excludes cash and cash equivalents. Fund characteristics will vary over time. <sup>7</sup> The portfolio turnover is as of the fund's fiscal year end and is subject to change. The fund's annual report includes further details regarding the portfolio turnover ratio. <sup>8</sup> FactSet. Average market cap is based on a weighted average. <sup>9</sup> Beta measures the sensitivity of the fund to its benchmark. The beta of the market (as represented by the benchmark) is 1.00. Accordingly, a fund with a 1.10 beta is expected to have 10% more volatility than the market. <sup>10</sup> R-squared is a measurement that indicates how closely a fund's performance correlates with the performance of its benchmark index. R-squared can range from 0.00 to 1.00, with 1.00 indicating perfect correlation to the index. <sup>11</sup> Sharpe ratio is a measure of excess return per unit of risk, as defined by standard deviation. A higher Sharpe ratio suggests better risk-adjusted performance. <sup>12</sup> Standard deviation is a statistical measure of the historic volatility of a portfolio. It measures the fluctuation of a fund's periodic returns from the mean or average. The larger the deviation, the larger the standard deviation and the higher the risk. <sup>13</sup> Upside capture ratio measures a manager's performance in up markets relative to the market itself. Downside capture ratio measures a manager's performance in down markets relative to the market itself.
