CROCI® (Cash Return on Capital Invested) is a proprietary valuation methodology with origins in investment research conducted to identify attractively valued companies across sectors and geographic locations.

¹ Russell 1000 Value Index tracks the performance of those Russell 1000 Index stocks with lower price-to-book ratios and lower forecasted growth values.

² Beta is a historical measurement of a fund's sensitivity to the movements of the fund's benchmark index. A fund with a beta greater than one is more volatile than the benchmark. A fund with a beta less than one is less volatile. Beta is based on a three-year period relative to the index. Average market capitalization measures the size of the companies in which the fund invests. Sharpe ratio is a measure of returns reward per unit of risk for a given period. A high sharpe ratio reflects a strong historical risk-adjusted performance. Standard deviation is a three-year statistical measure of the volatility of a fund's returns. Generally, the greater the standard deviation, the greater the fund's volatility. ⁵Source: Morningstar, Inc. as of 05/31/2023.

War, terrorism, sanctions, economic uncertainty, trade disputes, public health crises and related geopolitical events have led and, in the future, may lead to significant disruptions in U.S. and world economies and markets, which may lead to increased market volatility and may have significant adverse effects on the fund and its investments.

Fund risk: Stocks may decline in value. The fund will be managed using the CROCI® Investment Process which is based on portfolio management's belief that, over time, stocks which display more favorable financial metrics (for example, the CROCI® Economic P/E Ratio) as generated by this process may outperform stocks which display less favorable metrics. This premise may not prove to be correct and prospective investors should evaluate this assumption prior to investing in the fund. Dividends are not guaranteed. If the dividend-paying stocks held by the fund reduce or stop paying dividends, the fund's ability to generate income may be adversely affected. Preferred stocks, a type of dividend-paying stock, present certain additional risks. The fund may lend securities to approved institutions. Please read the prospectus for details.
